EXPERIENCE

Software Engineer

Trimble Inc.

📅 May 2025 – Ongoing

📍 Mexicali, B. C.

- Working with the core backend team, maintaining and iterating on asynchronous publisher/subscriber services utilizing Azure Service Bus and Kubernetes.
- Working focus on platform stability & correction of throughput bottlenecks in business-critical processes.
 - Refactored bespoke workflow engine reducing errors due to out-of-memory by 100%.
 - Analyzed and optimized query execution plans for read-heavy data on the platform, in one instance bringing execution times down from >30 seconds to 2 seconds.
 - Profiled legacy APIs to diagnose thread-pool starvation issues and refactored in order to minimize I/O, reducing timeouts in external services by 40%.

Software Engineering Intern

Trimble Inc.

📅 July 2024 – May 2025

📍 Mexicali, B. C.

- Designed and developed an automated off-boarding process for customers of the Xchange platform, reducing manual intervention almost entirely.
- Implemented both back-end and front-end functionality in support of the feature, acting as the sole developer with technical guidance from throughout the organization.

PROJECTS

Sistema Hielo

HielOh

📅 April 2025 – July 2025

- Architected the reconstruction of HielOh's internal management system, driving managerial operations.
- Engineered the internal reporting portal and back-end services for consumption by downstream applications.

Syndicate Reports

Universidad Autónoma de Baja California

📅 October 2024 – February 2025

- Architect and developer for UABC's syndicate reports portal, supporting over four thousand faculty members.
- Created a front-end via Vite/React that provided access to individual reports on a teacher-by-teacher basis alongside a global administrative dashboard, supported by a minimal .NET backend.

TECHNICAL SKILLS

Backend

C#

Go

.NET

Azure Service Bus

Entity Framework

Frontend

TypeScript

React

Vite

Cloud & Tools

Azure

Kubernetes

Docker

Terraform
